65																				43	47	51	55	59	64	68	73	78	83	88	94	100									

Though quite accurate, this formula tends to over - estimate the weight of large fish (over 50"). To improve the accuracy for these fish, subtract 1/2" from their actual girth before using this chart or formula.

Canadian Live Release Record:

Muskellunge 62.25" x 27.50" (Approx. 57 lb.'s)
 Caught by Bill Craig on July 12, 1997 in the Ottawa River near Hull.

Canadian Record:

Muskellunge 65.00 lb.'s, 58.00" x 30.50", 29 years old.
 Caught by Ken O'Brien on Oct. 16, 1988 while walleye fishing with 8 lb. test line and a 4" Rapalla. It was caught in about 12' of water in Blackstone Harbour (part of the Moon River Basin in Ontario).

 - Possible New Canadian Record!

Weight Estimating Formula:

Length x Girth x Girth = Weight in Pounds
 800

This formula gives a good approximation if your measurements are accurate.
